

The 9th IEA Heat Pump Conference, 2008

Date: May 20-22, 2008
Location: Zürich, Switzerland

The Conference program will cover the following topics:

- **Markets** – market status, trends and future opportunities
- **Policy, standards and market strategies** - government, utility and professional society activities related to heat pumps
- **Research and development** – new developments in heat pumping technologies
- **Systems** - advanced electrically and thermally operated systems, and ground source systems
- **Applications** – demonstrated energy efficiency and environmental advantages
- **Technology** – advances in equipment design and development
- **International activities** – discussion of actions in response to climate change initiatives.

Papers: Both oral papers and posters will be presented. If you are interested in submitting a paper, please contact your Regional Coordinator or see the conference website. Deadline for a 200-300 word abstract is **April 30, 2007**.

Workshops: There will be opportunities for organisation of workshops before and during the Conference. Interested organisations should contact the Regional Coordinator.

Exhibition: There will be an exhibition in connection with the Conference. For those interested in exhibiting, please contact your Regional Coordinator.

Information: For more information, please visit the Conference website: www.hpc2008.org
For information on papers and workshops, conference program, etc, please contact the Regional Coordinator for Europe and Africa:
